 Weight : 400 kg

Build on
 (ready to use)

Length : 6,00 m
 High : 6,60 m
 Width : 5,00 m
 Weight : 400 kg

Base Unit :

30% of the structure is made of aluminium and the base is made of steel (the whole base unit is galvanised steel (inside and out) so you needn't worry about it rusting. The whole set is made according to special technical calculations that guarantee maximum security

Tower poles:

The tower poles are in two halves and slot easily together to be secured to the base. The tower poles have now been given extra strength by additional sleeving inside.

Purposes:

One bed trampoline is a good investment in smaller places where the four bed trampoline is too big. It can be placed inside the shopping centers or any other places.

Operation:

The jumper secured with harness make jumps and acrobatic movements to the high 7 meters. This can be used by people up to 85 kg.

Trampoline :

Trampoline 4,27 m (very big for the safe jumping) with spring cover and special spring tool

Winch:

For single bungee trampoline we use 750W winch made in Italy. This winch is specially designed for bungee 1 person because of the specific construction

Bungee Cords:

We supply new units with elastic bungee cords, which we find to provide a superior bungee experience in comparison to the tubular rubber ropes sometimes used in other models. The bungee cords are made in Germany with TUV certificated loops and give 300% expansion.

INCLUDED IN THE PRICE
