Build on
 (ready to use)

Length : 9.00 m
 High : 6.60 m
 Width : 3.00 m
 Weight : 450 kg

Base Unit/Trailer:

Our newest model is a revolution on the market. Easy set up (one person 2 hours), small space required, small investment, fast money return. It's not possible to describe all advantages of our product in words - You must see it!

Tower poles:

The tower poles are in two halves and slot easily together to be secured to the base. The tower poles have now been given extra strength by additional sleeving inside.

Purposes:

Two bed trampoline is a good investment when the four person is too expensive or the space is limited.

Operation:

The jumper secured with harness make jumps and acrobatic movements to the high 7 meters. This can be used by people up to 90 kg.

Trampoline :

Trampoline 4,0 m (big for the safe jumping) with spring cover and special spring tool.

Winches

Our German winches are mounted on the base of unit. They are now bigger, stronger and faster than before with a wire rope.

Bungee Cords:

We supply new units with elastic bungee cords, which we find to provide a superior bungee experience in comparison to the tubular rubber ropes sometimes used in other models. The bungee cords are made in Germany with TUV certificated loops and give 300% expansion.

INCLUDED IN THE PRICE
