 Weight : 700 kg

Build on
 (ready to use)

Length : 11.00 m
 High : 8.00 m
 Width : 11.00 m
 Weight : 700 kg

Base Unit:

Structure is made of aluminium and stainless steel, according to special technical calculations meet all international safety norms. This model is 8m high what makes it the biggest bungee available on the market.

Poles :

Aluminium poles are very strong with additional sleeving inside. They are very light for easy assembly.

Operation:

Using bungee cords and secured with adjustable harness (xs,s,m or l) the jumper is bouncing on a traditional trampoline and reach up to 8 meters into the air where they are free to experiment with acrobatic movements and summersaults (our record is 4 in one jump). The play is totally safe and can be even used by children aged 2.

Trampolines :

4 trampolines 4,27 m (very big for the safe jumping) with spring cover and special spring tool

Winches:

Our German winches are mounted on the the base of unit. They are now bigger, stronger and faster than before with a wire rope.

Bungee Cords:

We supply new units with elastic bungee cords, which we find to provide a superior bungee experience in comparison to the tubular rubber ropes sometimes used in other models. The bungee cords are made in Germany with TUV certificated loops and give 300% expansion.

INCLUDED IN THE PRICE

ELASTICS & HARNESSES

Four sets of high quality elastics, each elastic is for 12 kg, 14 in one set
