

OPERATION

Setting up time : 4 hours
 Supervising : 2 persons
 Maximum users weight : 110 kg
 Users at one time : 1
 Space required : 11m x 11m

**NEW for
2009**

Balloon:

The balloon is made of special kind of nylon material. The material is very strong. After filling with helium it can rise up a person with the weight up to 90 kg.

Security:

The balloon is very safe. When You make for example a hole it will go down after few days. It's not possible helium to blow.

Purposes:

This balloon should be used in one place for more than a month. It's because of the cost of helium. Once the balloon is filled with helium You can't use it again.

Operation:

The flight can be up to **25m** to the sky !
 Maximum weight of the person can be 90 kg.
 Total time of flight is around 5 minutes.

SOME CALCULATIONS

| Space rent | Employees | Helium (in total) | Purchase of the extreme balloon | TOTAL |
|--------------------|---------------|-------------------|---------------------------------|----------|
| 4000 € | 6000 € | 2500 € | 9500 € | 22.000 € |
| Days of the season | Hours / a day | Persons / a hour | Price for a flight | TOTAL |
| 90 | 5 | 5 | 15€ | 33.750 € |

This calculation shows that You can easily get **11.750 €** after one season. This calculation was made according to our true evidences in one of the European countries (one big Greek island)
